

VAN METASOFT

Product Overview

Van Metasoft is a high potency bioinsecticide based Metarhizium anisole working with broad spectrum activities against soil insects like white grubs, termites, cutworms, pupae and other soil-inhabiting and foliar insects like hoppers by inhibiting chitins on insects' cuticle. It causes primary and secondary disease epizootic among insects appearing at later stages also. This makes sprays effective and cross-infective for a longer period, thereby reducing the cost significantly.

Product Target

- White grubs, termites, cutworms, pupae and other soil-inhabiting insects.
- Foliar insects like Mango hoppers, Brown Plant hoppers and rice insects.

Product Speciality

Water soluble, hence user friendly

High efficacy

Low dosage

High potency

Product Advantages

Broad spectrum activities against sucking pests and caterpillars.

Reduce the cost of application per acre area drastically.

Upon spraying, it leaves no stain on leaves and can be mixed with half doses of chemical insecticides and all sulphur-based fungicides.

Eco-friendly, Non-toxic, and user-friendly.

Method of Application and Dosage

- 1)** Spray Metasoft @15-20 gm and Wettomate (An adjuvant) @ 5 ml in 15 lit glasses of water with a knapsack spray pump at 20 days intervals.
- 2)** Take 250-500 gm Metasoft and 50 ml Runoff-100 in 200 lit water and spray on orchard tree crops.
- 3)** Drench Metasoft in soil @ 250-500 gm in 200 lit water per acre in the rhizosphere zone.
- 4)** Apply through drip irrigation @ 250-500 gm Metasoft for a 1-acre crop/plantation.

Compatibility:

Van Metasoft contains living organisms and is sensitive to chemical fungicides and botanical pesticides. It is synergistic and gives complementary results if applied with organic fertilizers, chemical insecticides, all ssulfursand biofertilizers including mycorrhiza.

Target Crops: Cotton, Banana, Papaya, Sugarcane, Cereals, Pomegranate, Oil Seeds, Tea, Vegetables, Tobacco, Pulses, Spices, Grapes, Coffee.
