

KEMAGRO PRO

Description

Kemagro Pro Humic Acid 10% liquid is a non-plant food soil or foliar treatment that offers many benefits to soil and crops. Humic acid has been shown to enhance soil structure and fertilization as well as alter nutrient root architecture to improve nutrient uptake. Use humic acid with your regular feeding program to enhance root, leaf, and shoot growth and protect your plants against heavy metal toxicity.

Using humic acid can optimize your current fertilizing program by enhancing the uptake of endogenous and exogenous nutrients.

Usage Instructions

1-2 ml per litre once a week

Foliar: 1-2 ml once or twice a week

DIRECTIONS FOR USE

HUMIC ACID 10% can be applied to most vegetable and cucurbit crops, field and row crops, deciduous fruit and nut trees, grapes, berries, olives, avocados, and citrus.

HUMIC ACID 10% is designed for soil application and for foliar use. Apply directly to soils or inject through irrigation systems where water quality is satisfactory to maintain solubility. Foliar applications should be as a dilute spray. Application rates vary by crop or situation. Mixing with irrigation water for the field.
