

## **KEM GROW**

HBR 0.04%

### **Product Description:**

Kem Grow enables crops to overcome reproductive inefficiency barriers by triggering vital physiological processes, ensuring higher yields of vegetables, fruits, fields and cash crops.

### **Mode of Action:**

Improves fertility of floral parts, by increasing pollen power.

### **Crops Dose per Acre (gm/ml)**

All Crops

1. Mix 100 ml in 200 Lit water for 1 Acre @ budding stage
2. 100 ml per acre @ 15 days after 1st spray
3. 50ml per acre @ 15 days after 2nd spray

### **Benefits:**

- Enhances pollen power and fertility of crop
- Improves flowering and reduces flower drop
- Increases fruit setting and aids the production of more seeds per fruit.
- Enhances crop's ability to withstand biotic and abiotic stresses.
